Bonding Packet Answers

Ionic Bond: Na-F bond. Na is a metal and has a low electronegativity (attraction of electrons) while F has a high electronegativity. Therefore, fluorine will take an electron from sodium in an ionic bond. Now, try it on your own. For the following compounds or molecules, determine if they are covalent or ionic.

Unit 6 Packet and Key - Ms. Kovach's Chemistry Class

In this simulation, students investigate both ionic and covalent bonding. Students will have the opportunity to interact with many possible combinations of atoms and will be tasked with determining the type of bond and the number of atom needed to form each. The simulation visually differentiates between the transferring of electrons when ...
