Nikon D60 Manual Sb 900 - morganduke.org

Then use the D60's pop-up in manual mode at a very low power. The SB-900 will see that flash and slave to it. The SB-900 will see that flash and slave to it. You can't use iTTL or anti-red-eye (since the pre-flashes would set off the SB-900 too soon), but until you go with some other triggering method, this is a way you can play with it.

Nikon 3D Color Matrix Metering II: The D60's 3D Color Matrix Metering II evaluates each scene for brightness, color, contrast, size and position of shadows and highlights, selected focus area and camera-to-subject distance, comparing that information against an onboard database of more than 30,000 actual photographic scenes. The result delivers instantly and precisely determined exposures for ...

The foot on the Nikon SB-900 is identical thickness to the foot on the Nikon SB-800. There are some forums and blogs that claim the SB-900 is not compatible with certain accessories. I am pleased to say that I have 2 SB-800's and the feet are of identical thickness to the SB-900 that Nikon lent me for testing purposes.

The SB-900 is fully recycled: Rear ready-light lights up and front light blinks Insufficient light for correct exposure (in i-TTL, Auto Aperture flash, Non-TTL Auto flash, or Distance-priority manual flash operations): ready-lights and front lights blink after shooting

Nikon | Imaging Products | SB-900

The SB-50DX works in TTL (Through-The-Lens metering) mode on the digital SLR cameras like the D100 and D1H. The only reason most people might have a need for the larger and more expensive flashes like the SB-80DX, SB-28 and SB-28DX is for more power. More power than the SB-50 is really only needed if you need to shoot at long distances or with ...
