•Thank you for buying and using Panasonic AC Servo Motor and Driver, MINAS A4P Series. •Read through this Instruction Manual for proper use, especially read "Precautions for Safety" (P.8 to 11) without fail

Panasonic Servo Driver Error Code

If no improvement can be seen or the problem cannot be identified, turn on the servo with the motor power cable disconnected. If Err14 is generated by turning the shaft only a little, then amplifier breakage is possible. If no error is generated, possible faults include a broken motor grounding wire, motor wire contact failure, or motor failure.
