Buy The Ultimate Mathematical Challenge Paperback. Specially curated from the UK Mathematics Trust's catalogue of puzzles, most of these problems can be tackled using no more than a little numerical knowledge, logical thinking and native wit.

Junior Maths Challenge Grade Boundaries - Mathsaurus

It follows that $2016 = (24 \times 32) \times 2 \times 7 = (22 \times 3)^2 \times 2 \times 7 = 122 \times 14$. Therefore $\sqrt{2016} = 12 \sqrt{14}$. Also, $\sqrt{56} = 2 \sqrt{14} = 2 \sqrt{14}$. Hence $\sqrt{2016} + \sqrt{56} = 12 \sqrt{14} + 2 \sqrt{14} = 14 \sqrt{14}$. Now, $14 \sqrt{14} = 141 \times 141/2 = 141 + 1/2 = 143/2$. Therefore $k = 3/2$. © UKMT November 2016 www.ukmt.org.uk 13. Primary Mathematics Challenge - February 2016

UK Junior Mathematical Challenge. Some pupils from years 8 and 9 pupils took part in the UK Junior Mathematical Challenge on Tuesday 30 th April. This was challenging but gave them the opportunity to apply their mathematical skills to problem-style questions. Congratulations to all who took part. Many of the students were awarded certificates.
